WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Cooler weather is forecast today for most locations and temperatures are expected to fall to near typical late-August values tomorrow and Friday.
- There is a chance for additional isolated thunderstorms today, primarily over the elevated terrain in the northern Sierra, southern Cascades and Shasta/Trinities.
- The National Weather Service has issued a Red Flag Warning for potential lightning-caused fire ignitions. The lightning potential ends tomorrow as the moisture aloft is swept east of the PG&E territory.

SOUTHERN CALIFORNIA

- Increasing temperatures across the region into the weekend.
- Hot and dry conditions are expected across the deserts.
- On Sunday and Monday a surge of monsoonal moisture will increase the humidity in all areas and bring a chance of showers and thunderstorms, mainly over the mountains and deserts during the afternoons Sunday through Tuesday.
- Precipitation is expected with any thunderstorm, so chances of dry lightning strikes are minimal.
